

4TH ANNUAL  
**Multiple Sclerosis  
Awareness Day**  
Information Fair

**THURSDAY, MARCH 15, 2012**

7 am to 7 pm

Hospital Lobby ★ All Are Welcome

Learn About Our Progress in Multiple Sclerosis Research

Speak with Our Team of MS Specialists

Hear our renowned experts, Dr. Patricia Coyle and Dr. Lauren Krupp,  
make a brief presentation and answer your questions

Dr. Patricia Coyle - 12:30 pm ★ Dr. Lauren Krupp - 1:30 pm

Presented by the Department of Neurology, the MS Comprehensive Care Center  
(part of Stony Brook's Institute for Advanced Neurosciences)  
and the National Pediatric MS Center

Multiple sclerosis (MS) is a chronic, often disabling disease that attacks the central nervous system. For each person, the progress, severity and specific symptoms of MS are unpredictable and vary greatly. In the United States today, there are approximately 400,000 people with MS — with 200 more people diagnosed every week. New treatments and advances in research are giving hope to those affected by the disease.
